

M HEALTH FAIRVIEW UNIVERSITY OF MINNESOTA MEDICAL CENTER PGY2 Infectious Diseases Pharmacy Residency

Program Overview

The purpose of this PGY2 pharmacy residency program is to build on Doctor of Pharmacy (PharmD) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete an accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification, if available.

The Infectious Disease Residency Program (PGY2) is a 12-month program located at M Health Fairview University of Minnesota Medical Center in Minneapolis, Minnesota. We recruit for two residency positions. This program prepares the residents to become a professional infectious diseases pharmacist through a broad range of learning experiences in advanced areas of infectious diseases and antimicrobial stewardship.

At M Health Fairview University of Minnesota Medical Center, we balance the latest in technology and treatments with patient-centered care. We provide care for a wide range of specialties including, medicine, critical care, transplant-both solid organ and stem cell, and pediatrics. As the core teaching hospital of the University of Minnesota Medical School and College of Pharmacy, our hospital is among the most respected in the nation, providing superior health care results.

"The Infectious Diseases (ID) Pharmacy Residency at M Health Fairview UMMC provided me with a strong foundation of clinical knowledge in caring for a complex patient population, developed my interprofessional skills while collaborating with various ID providers, and enhanced my teaching capabilities through a layered learning model. It is no surprise that UMMC is an IDSA designated Antimicrobial Stewardship Center of Excellence! I will forever cherish the personal and professional relationships built during residency."
- Akshith Dass, PharmD, BCIDP, BCPS, PGY2 ID Program Graduate 2020
