

HealthEast Medical Laboratory (HML)

Important Billing Change Notification

Dear HML Partner

Effective 3/6/2018, HML changed the methodology for how we perform the Syphilis Screen. (Previous Notification Attached)

Due to this testing change, the first initial test of the Syphilis Screen will now have the CPT 86780. Because of this, when a Prenatal Screen with Hemogram (PN1 or LAB2194) is ordered, we can no longer bundle into 80055.

This will have no financial impact on your business/site/clinic and/or your patients unless the initial Syphilis Screen is reactive or equivocal and an RPR screen is reflexed.

HML will continue to bill one (1) charge to our clients when a prenatal screen (LAB2193) or prenatal screen with Hemogram (LAB2194) is ordered. The HML Reference Manual will also be updated to reflect these changes.

Any changes to charges will be updated as soon as possible and the correct charges should appear on your next billing statement.

We are so sorry for any inconvenience this may have caused.

If you have any questions or concerns please contact:
